Detailed Description

Claims

Detailed Description

... of the present invention to allow buyers to make  
purchases at lower prices to activate **electronic** commerce through  
**auctions** on the network.

It is another advantage of the present invention to provide a separate...  
...of the present invention;

FIG. 3 shows a flowchart of a process for registering a **bid** in the  
**electronic** commerce system according to a preferred embodiment of the  
present invention;

FIG. 4 shows an exemplification of displaying a failed bid at the time  
of **bid** registration in the **electronic** commerce system according to a  
preferred embodiment of the present invention;

5

FIG. 5 shows a flowchart for a successful **bid** in the **electronic**  
commerce system according to a preferred embodiment of the present  
invention; and

FIG. 6 shows an exemplification of a successful **bid** process in the  
**electronic** commerce system according to a preferred embodiment of the

present invention.

#### DETAILED DESCRIPTION OF THE...

...seller name, a contact point, and product information (e.g., a product code and a **category** ) handled by the **seller** .

The bid **database** 43 stores bid information of buyers who have offered bids through various networks 1, including...

...be  
described in detail.

FIG. 3 shows a flowchart of a process for registering a **bid** in the **electronic** commerce system according to a preferred embodiment of the present invention.

In the preferred embodiment...

...in step  
S150. When the buyer buys a coupon in the like manner of general **electronic** commerce, the **bid** register 32 assigns bid rights to the buyer.

When the buyer acquires the coupon in...

...bid processing based on the  
bid information.

FIG. 5 shows a flowchart for a successful **bid** in the **electronic** commerce system according to a preferred embodiment of the present invention.

As shown in FIG...bid participants to the bid target products as subsidy, more buyers can participate in the **bid** , thereby activating **electronic** commerce.

While this invention has been described in connection with what is presently considered to...

#### Claim

... is the closest to the highest bidding price of the product from among the selected **bidding** prices.

2 The **electronic** commerce system of claim 1, wherein the successful bid processor selects the buyer who offered...

...least two buyers have suggested the bidding price which is the closest to the highest bidding price.

3 The **electronic** commerce system of claim 1 , wherein the bid register provides a bid opportunity to the...

...bid sale based on the  
information stored in the failed bid database after a successful **bid** is finished.

6 An **electronic** commerce method of a system connected to a plurality of buyer terminals through a network...

...and

(c) notifying the buyers who have offered the successful bidding

price of a successful **bid** .

7 The **electronic** commerce method of claim 6, wherein (b) comprises selecting the buyer who offered the bid...

...least  
two buyers have suggested the bidding price which is the closest to the highest **bidding** price.

8 The **electronic** commerce method of claim 6, wherein (a) comprises providing a bid opportunity to the buyer...

...the failed bid price after the successful bid is finished to thus perform a failed **bid** sale.

10. The **electronic** commerce method of claim 6, wherein the bidding price is not open to the public...

Real-time online support for small companies is available from such services as NoWonder now ePeople.com, all.com, UniPress Software's FootPrints 4.0, and the free PC Pitstop service. Many providers offer a range of services, including Internet marketplaces, interactive technical advisors, knowledge bases, Web-based problem tracking components, and remote diagnostic tools. NoWonder links small companies to thousands of providers in over 100 countries. The providers take part in a reverse-auction bidding process, in which the small company submits a technical problem and chooses a service option, which can be a one-time transaction or a longer contract, from many providers. Support options available include live help, e-mailed problem resolutions, and links to resources for self-diagnostics. According to Anthony Lye, NoWonder's CEO, the customer obtains a portfolio of service providers based on the product, time of day, industry, and experience. Even if seven or eight providers work on the problem, only one bill is sent and one incident reported. All.com allows intercommunication among small companies and online support staff certified for Dell expertise levels. Small companies download diagnostic and repair code from Motive Communications. The system generates information about configuration and problems. FootPrints 4.0 provides a Web-based problem and tracking system. PC Pitstop uses an expert system and downloaded auto-fix software to detect problems and automatically resolve them or offer advice on the next step to take.

Abstract: Presents the results of a survey conducted among aerospace part and sub-assembly suppliers to quantitatively assess their reaction to online reverse auctions and its impact on their business policies and practices. Findings are compared to the qualitative benefits identified for suppliers by third party **online reverse auction service providers**. Determines that incumbent suppliers do not realize the benefits suggested by **online reverse auction service providers**. Identifies new sources of costs which accrue to buyers and are not accounted for in so-called "total cost" request for quotes, including retaliatory pricing practices, less cooperative relationships, and sourcing work back to the original supplier. Concludes that both buyers and sellers participating in online reverse auctions will likely encounter unfavorable outcomes, thus questioning the effectiveness of this new purchasing tool as a means of reducing the unit price of buyer-designed engineered components. Gintic's car accessories portal

SINGAPORE: GINTIC TO LAUNCH CAR PARTS PORTAL

The Straits Times (XBB) 08 Jan 2001 BizIT p.12

Language: ENGLISH

In Singapore, a car accessories and spare parts portal (at [www.autotomorrow.com](http://www.autotomorrow.com)) was launched jointly by Gintic e-Solution Pte Ltd and investment firm Bock Chuan Investment Pte Ltd. The portal provides ASP services like webpage design and maintenance, and B2B and B2C transactions. Other B2C features include **online** forum, garage **auctions**, retailers and **service providers** ' listings, legal advice and automobile information. Gintic e-Solutions is a subsidiary of Gintic Institute of Manufacturing Technology. \*

EUROPEAN COMPANIES TARGET INFORMATION SERVICES MARKET

US - EUROPEAN COMPANIES TARGET INFORMATION SERVICES MARKET

Telephony (TLY) 24 April 1989 p3

ISSN: 0040-2656

The European Commission is backing telecommunications **service providers** in Europe in **bids** to take stakes in the **computerised** information services market in the US. IBM, Alcatel and France Telecom, the Deutsche Bundespost and Siemens, Philips and GPT are the companies involved. They will jointly present an exhibition at the Videotex Industry Association's show in June 1989. At the show they will demonstrate live connections to videotex databases in Europe including more than 10k connections on Teletel in France.

The Return Exchange, a company that handles returned merchandise, also builds a **database** of **buyers** return habits. According to spokespeople, several retail customers are already seeing profits from Return Exchange's data, even though the information could be expensive to fussy shoppers. However, privacy advocates worry that frequent returners of products could be regarded as too difficult to deal with and will be 'frozen out by some retailers.' Most online shoppers expect and get easy and precise return processes, and analysts say return rates range from 5 to 20 percent based on the merchandise. The Return Exchange wants a slice of the projected \$1 billion per year online return business. The Return Exchange captures and processes return information directly from consumers, then warehouses the returned product and refurbishes it. The completed product is resold in an **online auction**. Retailers pay Return Exchange a transaction-based fee. Return Exchange is attractive because it keeps records on each shopper's return habits and shares the data with other retailers; Return Exchange also creates a so-called 'returns rating' that resembles a credit rating. The database of ratings could be used, for example, to deny a customer the best type of promotion because he or she is on a list of customers who frequently return products. According to a spokesperson for the firm, retailers using its data know only how many times a customer has returned products and the dollar amounts involved.

Germany: Commerzbank launches bid for Consors  
Sddeutsche Zeitung (SDZ) 16/17 Feb 2002 p.27  
Language: GERMAN

German Commerzbank AG confirmed that it has launched a bid for German online broker Consors Discount Broker AG. The subsidiary of troubled SchmidtBank GmbH & Co KG of Hof is to be auctioned off by the end of March 2002. Together with Consors, Commerzbank subsidiary Comdirect Bank AG would reach a customer base of around 1.lmn. Other bidders for Consors are said to include US online broker E-Trade as well as French SociZtZ Generale and BNP Paribas. In contrast, German Deutsche Bank, HypoVereinsbank and Dresdner Bank are said to have no plans to bid for Consors. For the sale of Consors, the price will be decisive.

Taipei Bank to bet on new biz; lotto jackpot to hit NT\$380 M.  
Taiwan: Gaming, sales diversity from Taipei Bank  
The Taiwan Economic News (AMH) 06 Feb 2002 Online  
Language: ENGLISH

Taiwan's Taipei Bank plans to offer movie ticket and transport sales services as well as **electronic** commerce in a **bid** to boost its financial strength. The bank is also looking into the collection of national health insurance member premiums. Its major diversified business now includes gambling on the Internet. In complementing its gaming operations, a card for accessing NT\$ 10,000 or NT \$5,000 of their bank accounts to gamble will make its debut by end-March 2002. The move into gaming had been spurred by the 16 January 2002 success in "public-interest" lottery.

**Title: Spatial domain digital watermarking of multimedia objects for buyer authentication**

Author(s): Mukherjee, D.P.; Maitra, S.; Acton, S.T.

Author Affiliation: Electron. & Commun. Sci. Unit, Indian Stat. Inst., Calcutta, India

Journal: IEEE Transactions on Multimedia vol.6, no.1 p.1-15

Publisher: IEEE,

Publication Date: Feb. 2004 Country of Publication: USA

CODEN: ITMUF8 ISSN: 1520-9210

SICI: 1520-9210(200402)6:1L:1:SDDW;1-U

Material Identity Number: H274-2004-001

Language: English Document Type: Journal Paper (JP)

Treatment: Applications (A); Practical (P)

**Abstract:** Most of the existing watermarking processes become vulnerable when the attacker knows the watermark insertion algorithm. This paper presents an invisible spatial domain watermark insertion algorithm for which we show that the watermark can be recovered, even if the attacker tries to manipulate the watermark with the knowledge of the watermarking process. The process incorporates buyer specific watermarks within a single multimedia object, and the same multimedia object has different watermarks that differ from owner to owner. Therefore recovery of this watermark not only authenticates the particular owner of the multimedia object but also could be used to identify the buyer involved in the forging process. This is achieved after spatially dividing the multimedia signal randomly into a set of disjoint subsets (referred to as the image key) and then manipulating the intensity of these subsets differently depending on a buyer specific key. These buyer specific keys are generated using a secret permutation of error correcting codes so that exact keys are not known even with the knowledge of the error correcting scheme. During recovery process a manipulated buyer key (due to attack) is extracted from the knowledge of the image key. The recovered **buyer** key is matched with the exact **buyer** key in the **database** utilizing the principles of error correction. The survival of the watermark is demonstrated for a wide range of transformations and forging attempts on multimedia objects both in spatial and frequency domains. We have shown that quantitatively our watermarking survives rewatermarking attack using the knowledge of the watermarking process more efficiently compared to a spread spectrum based technique. The efficacy of the process increases in scenarios in which there exist fewer numbers of buyer keys for a specific multimedia object. We have also shown that a minor variation of the watermark insertion process can survive a "StirMark" attack. By making the image key and the intensity manipulation prompts specific for a buyer and with proper selection of error correcting codes, certain categories of collusion attacks can also be precluded. Title: Database options for business ( buyer 's guide)

Author(s): Austin, S.

Journal: Business Computer Systems vol.4, no.9 p.81-100

Publication Date: Sept. 1985 Country of Publication: USA

CODEN: BCOSDI ISSN: 0745-0745

Language: English Document Type: Journal Paper (JP)

Treatment: Practical (P); Product Review (R)

Abstract: Until recently, microcomputer users in search of database software gravitated toward either Software Publishing's pfs:File of Ashton-Tate's dBase II or III. However, choosing software is rarely a 'black or white; proposition. Today user requirements usually fall somewhere between the simplicity of pfs:File and the complex, programmable dBase III. Choosing appropriate software has now become an exacting chore for PC managers. In an attempt to match programs with user needs, a buyer 's guide to 37 packages is presented. The survey outlines the trends shaping the current database software market and considers factors such as: system requirements; file structure; system features; security; and price.
